

## Rodrigo Alves

front end developer

Hi! I'm a passionate front end developer looking for the opportunity to tackle new challenging projects and expand my knowledge in an internship. I have experience building custom html emails, landing pages and responsive websites that were used by real world clients. My next developer adventures include exploring ES6, learning about Vue, React, Angular 2 and diving into server side Javascript with Node and MongoDB. I invite you to see some of my work on my website [rodrigo96.github.io](http://rodrigo96.github.io) and I would love to meet you for an interview.
